| 1   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Colonel Waldron: “So a critical capability for any of this to happen are the inherent vulnerabilities that were built into ES&S and Dominion software, which is, you know, again, we’ve proven through, through our work that this is all related directly back to the soft, Smartmatic [] SGO Smartmatic software core. . . <b><i>the board of SGO Smartmatic</i></b> , because they own a, an air purification company. So just think about it, if you get to pick an administration that is favorable to your company, say if they [passed] the Green New Deal, and you’re going to make billions and billions of dollars off of government-mandated air purification systems and public buildings... <b><i>you would spend quite a bit of money on the frontside to make sure the election was done.</i></b> ” | Smartmatic identified by name |
| 2   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: So why [] <b><i>would Texas</i></b> , they denied these Dominion ones, and in your opinion, so they must have looked at them and said there’s something there we don’t like, but then they, over here, <b><i>with Smartmatic and these other ones, they were okay with that? What would be your opinion of why, why one, they would deny one machine</i></b> that, because they’re afraid of election fraud, and, and over here, they accepted that one? Mr. Ramsland: I think that it sometimes has more to do with politics and influence, who gets through and who doesn’t [] <b><i>for the machines.</i></b> ”  | Smartmatic identified by name |

| 3   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “. . . 7,060 were flipped from Trump to Biden, is that correct? . . . By machines, right? It had to be done by machines.” Matt DePerno: “. . . Absolutely by machines.”  | Smartmatic previously identified by name as one of the “machines” in question |
| 4   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “Right they were just flipped. In order for that to be off, you do the conclusion which I would right now, 100%, how could that be off? It would be something wrong with what?” Mr. DePerno: “The machines.” Mr. Lindell: “The machines, the machines. And what we’re showing here right now, what you’re going to see, all this what we’ve been talking about, <b><i>this massive machine election fraud that went on, where countries hacked into our election.</i></b> And nationwide, this is one little county in northern Michigan, and <b><i>these machines would do it right down to the precinct...</i></b> And so what I want to tell you all is this is the perfect example, just so you know, right down to the precinct level, what went on with these machine[s]...” | Smartmatic previously identified by name as one of the “machines” in question |
| 5   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “So everybody knows what you’re going to see, when you see this spike, you’re going to see a forensic footprint, how this happened and <b><i>who did it. China? Yes. If you’re on the Internet, the bottom line is you can get, you can cheat, you can do all kinds of things.</i></b> And that’s because otherwise you can’t explain any of these numbers.  | Smartmatic previously identified by name as one of the “machines” in question |

|     |        |                              | Right?” Matt DePerno: “That’s correct. The machine results don’t match up with the hand-tabulation.”  |   |
| 6   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “[T]he, you know, <b><i>the purpose of this whole show, obviously, is to show everyone in the world that these machines that this was the biggest fraud and the biggest crime I believe against humanity.</i></b> It was a crime against humanity.”  | Smartmatic previously identified by name as one of the “machines” in question |
| 7   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: And [] we’ve just shown everybody in the world 100% evidence that this was an attack on our country and is still under attack by China and other countries through the use of these machines used in our election.   | Smartmatic previously identified by name as one of the “machines” in question |
| 8   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “Could you guys all hear this? This is what we’re up against, this Dominion, <b><i>these machines is the biggest fraud in election. They stole this.</i></b> But now the truth is all going to be revealed.”   | Smartmatic previously identified by name as one of the “machines” in question |
| 9   | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “Okay, I want to ask you there when you say horrify, can you explain to everybody watching this right now, what, <b><i>what horrified you, was that the fact they could go online?</i></b> ” Russell Ramsland: “ <b><i>Well, there’s no effective security at all for your votes.</i></b> Your votes are stored overseas...” | Smartmatic previously identified by name as one of the “machines” in question |

| 10  | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “Doesn’t matter. Right. Somebody else picks our people for him so why vote, right? I mean, that’s the way [] it would have been. <b><i>Machines that go online, like, and it’s not, now you said earlier, it’s not just Dominion, it’s all the, all the machines that were used in this election.</i></b> What, is that what you would say?” Russell Ramsland: “ <b><i>Yes, that’s absolutely a fair statement.</i></b> And look, let me [] tell you a little bit about that. You know, <b><i>for these people that say it’s not online, we have videos of workers with pollbooks, who are swiping left on their pollbook and bringing up Netflix and getting a movie and watching it on their pollbook. How does that happen if it’s not connected to the Internet?</i></b> ” | Smartmatic previously identified by name as one of the “machines” in question |
| 11  | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “ <b><i>I know they were all online, but they, is it illegal for them to be online?</i></b> ” Russell Ramsland: “Well, it depends, some places yes, some places no. I mean, <b><i>the assurance is that you can trust the voting system because they’re not online, but they are most clearly online.</i></b> ”  | Smartmatic previously identified by name as one of the “voting system[s]”     |
| 12  | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Lindell: “Right, so <b><i>both of them involved the machines, everybody.</i></b> One we’ve talked about in this show is here. But then the cyber one is what you just heard from Russell, which he said earlier, <b><i>this is all the attack by the other countries that hacked in which we’re going to show you proof now that Russell doesn’t even know that we</i></b>  | Smartmatic previously identified by name as one of the “machines” in question |

| 13  | 2/5/21 | No. 1: <i>Absolute Proof</i> | Mr. Colbeck: "[T]hey've already admitted to the fact that <b>that control center had computers that were connected to the Internet.</b> And we saw the actual cable routed from the wall of the, of the TCF center to the control center. And we have election officials that admitted there were computers, in the control center that were connected to the Internet, and anybody [] worth their salt in IT land understands that if one computer is connected to the Internet, they're all connected to the Internet. You may say that it's airgapped, you may say you have a firewall. These are people that eat firewalls for breakfast." Mr. Lindell: " <b><i>So what you're saying, you knowing that, so if it's connected to the Internet, somebody out there could have hacked in and did the flipping of the votes.</i></b> " Patrick Colbeck: "Yep... So you may be thinking you're passing that information from point A to point B. But <b><i>there's nothing to prevent it from going to point C and the Internet, it's called a man in the middle attack.</i></b> " Mr. Lindell: "Right. <b><i>So that, so if you're on, if you're online, I mean that anybody could get in there and do that because they're intercepting that, it's interception. That's why you don't have, machines aren't supposed to be online in election, right?</i></b> " | Smartmatic previously identified by name as one of the "machines" in question |

| 14  | 2/5/21 | No. 1: <i>Absolute Proof</i> | <p>Mr. Lindell: “Well, I just met Dr. Shiva four weeks ago... And he knows all about these machines now and we’re going to hear some of the stuff that I found out [and] went wow, <i>this is a, absolutely validates this election fraud with these machines...</i>”</p> <p>***</p> <p>Dr. Ayyadurai: “I found out something interesting, I found out that these electronic voting machines, remember, there’s two ways you can vote. One is you vote, you give a paper ballot, and the paper ballot is counted by human beings, two people, that’s what occurred in Franklin County. But <i>in those other counties, they take that paper ballot when you vote electronically—</i>” Mr. Lindell: “<i>Into a machine.</i>” Dr. Ayyadurai: “It goes into a machine. And what happens in that machine? The paper ballot is converted to an image called a ballot image, no different than you taking a phone, a picture with your iPhone. Now so what is actually counted? The paper ballot gets put aside, the machine, the electronic quote unquote AI on the machine, actually tries to figure out where the circles are. And the machine is counting the ballot image. So at that stamp, <i>at that point I realized, oh my god, the ballot image is the ballot, the images are the</i> ballot...”</p> <p>***</p> | <p>Smartmatic previously identified by name as one of the “machines” in question</p> |

|     |      |                        | <p>Dr. Ayyadurai: “The other piece of the puzzle was, I found out that <i>the voting machines, as early as 2002, have a feature in there called a weighted race feature, where it’s embedded into the system where you can multiply candidates votes by a percentage.</i> All right, so what that means is you get 1,000 votes, I get 1,000 votes, I can multiply your votes by two, my votes by point five. And if everyone, anyone doesn’t believe this, go look up the deebot [sic] voting manual, go to page two dash 126 in the manual in the 2002 version, and you’ll see it in there.” Mr. Lindell: “<i>So did, were you able to prove that yours, that your [election] was stole by the machines? Did you mathematically [] prove, did you prove 100% that this could only be recreated by a machine to do that, 60/40, that’s it?</i>” Dr. Ayyadurai: “<i>Yeah.</i> So what we proved, Mike, was, first of all, we showed that the state had deleted the ballots images, which means that if they had the ballot image they could have found the algorithm.”</p> <p>***</p> <p>Mr. Lindell: “<i>This was a historical election fraud. This was coming from a lecture [sic] from machines, from these machines, of biblical proportions, of historical proportions. And now this is, it’s all going to get exposed.</i>”</p> |                               |

Those are the most severe attacks on our election system.</i></b> Now, this is, this exact information, the exact same type of information I should say, was presented to FBI Director, former FBI Director James Comey, by a whistleblower in 2015. <b><i>They knew, in fact that our election machines were open for hacking,</i></b> it’s important to understand that there are prismatic scoring algorithms that they knew about that entered the election, and <b><i>they steal the vote at the transfer points.</i></b> So at the point where the election, the vote is leaving the Secretary of State’s office and these machines, that is the point at which the vote is stolen at the transfer points...” | Smartmatic previously identified by name as one of the “machines” in question |

And it’s, you know, in Venezuela, when we went back, <b><i>when it started in Venezuela, didn’t they flip that country in two years, right?</i></b> ” Michael Flynn: “Right so that [] what I learned, almost right after the election, when we started to really go, okay, wait a second, what happened and we started to talk about how the machines really were impacting... really from the fourth through the seventh of November. We this, this issue of Venezuela came up and <b><i>we had the opportunity to [] get some feedback from one of the individuals who was in Venezuela at the time, who was working with [] the Chavez government.</i></b> And it actually caused, <b><i>they were able to take the, these machines that they had in Venezuela at the time to basically ensure that Chavez won the election and then subsequently down the road Maduro.</i></b> So [] <b><i>it was almost like the machinery was being tested, if you will, in another country to kind of get a sense of can you actually do this and to work for them.</i></b> ” | Smartmatic previously blamed as the source of supposed “Venezuela” origin story of Lindell’s conspiracy |

It’s just like, you talk to Matt DePerno in Michigan, and they’ve been going through this every day for months. And in Arizona, you know, it’s just like right now, when they find those [] all the stuff that’s missing, it doesn’t surprise anyone. I think everybody knows now, this is the biggest cover-up that’s probably in history for a crime. It’s so massive that they’ve covered this up with the machine, or all the stuff that they did with the machines.”   | Smartmatic identified by name                          |

I took that one piece of evidence, and I just went all in. This was something different, nobody had seen. <b><i>This was something that came through the machines, the Dominion machines, the Smartmatic and other machines.</i></b> This was a cyber attack. I didn’t know anything about cyber attacks. And boy, I learned, I had to learn real fast... <b><i>this was 100% an attack by China on our country through these machines.</i></b> ” | Smartmatic identified by name                          |

| 49  | 6/5/21  | No. 16: <i>Absolutely 9-0</i> | J. Alex Halderman: “ <i>I know America’s voting machines are vulnerable, because my colleagues and I have hacked them repeatedly. We’ve created attacks that can spread from machine to machine like a computer virus and silently change election outcomes.</i> And in every single case, we’ve found ways for attackers to sabotage machines and to steal votes.” Unknown Speaker 2: “When you say hacked, what were they able to do once they gained access to the machines?” Douglas Lute: “All sorts of things, <i>they could manipulate the outcome of the vote, they could manipulate the tally. They could delete the tally. And they could compromise the vote in any number of ways.</i> ” | Smartmatic previously identified by name as one of the “machines” in question |
